CURA E MANUTENZIONE

WAPROLACE

Per mantenere pulita la fibra sintetica WaProLace® Unopiù ha messo a punto un kit di pulizia ad hoc. Il kit è composto da un detergente speciale non schiumogeno che rimuove lo sporco e ripristina l'aspetto della fibra e uno spray di protezione che alimenta i plastificanti e mantiene la flessibilità della fibra. Il filtro UV ne mantiene inoltre l'aspetto e prolunga la durata nel tempo aiutando a prevenire le macchie.

CARE AND MAINTENANCE

WAPROLACE

To keep the synthetic fiber clean WaProLace® Unopiù has developed a specific kit. The kit is made of a special non-foaming detergent that removes dirt and restores the fiber and a protective spray that revives the plasticizers and maintains the fiber's flexibility. The UV filter helps the fiber maintain its appearance and extends its duration over time, protecting it from stains.
